The maps in this book are drawn from a wide range of sources, including libraries, museums, and private collections. They date from the earliest known maps to the present day, and they cover every corner of the globe. Some of the maps are famous, while others are little-known. But all of them are beautiful and fascinating.

The book is divided into five chapters, each of which focuses on a different aspect of cartography. The first chapter, "The World in Perspective," features maps that show the world as a whole. These maps range from the earliest known world map, the Babylonian Imago Mundi, to the modern-day Google Earth. The second chapter, "The Continents," focuses on maps of the individual continents. These maps show the physical features of the continents, as well as their political and cultural boundaries. The third chapter, "The Oceans," features maps of the oceans. These maps show the currents, depths, and other features of the oceans. The fourth chapter, "The Heavens," features maps of the stars and planets. These maps show the constellations, the planets, and other celestial bodies. The fifth chapter, "The Imagination," features maps that are not based on reality. These maps are often created for decorative purposes, or to illustrate a particular point.

Voyage Around The World: The Most Beguiling Maps is a must-have for anyone who loves maps. It is a beautiful and informative book that will appeal to a wide range of readers, from historians and geographers to artists and designers. The book is also a great gift for anyone who loves to travel. It is a book that will be treasured for years to come.

Here are some of the highlights of the book:

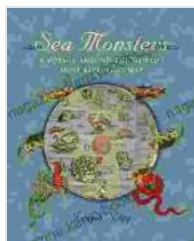

- Over 150 maps from around the world
- Maps from the earliest known maps to the present day
- Maps of the world, the continents, the oceans, the heavens, and the imagination
- Stunning photography and detailed descriptions
- A must-have for anyone who loves maps
